NETTDRIVEN ND1100 – 11 PORT UNIVERSAL USB-C DOCK

Designed for Flexibility and Convenience

Recently, laptops have been getting thinner and thinner. More and more devices have switched to having only one USB-C port, which creates issues when connecting multiple displays, keyboard, mouse, headset or printer. NettDriven ND1110 is designed especially for USB-C enabled laptops, regardless of brand, to extend the connectivity to more devices.

NETTDRIVEN ND1100 – 11 PORT UNIVERSAL USB-C DOCK

Designed for Flexibility and Convenience

With 11 additional ports, users are given more flexibility: VGA | HDMI | RJ45 GbE LAN | USB-C | USB 3 | Stereo Audio Jack | SD Card and Micro SD Card. With all this ports on an intergrated All-In-One Dock, user experience is drastically improved having all these connections ports readily available.
